

Slash Energy Costs up to 50% with Triple i's Free Data Logging Atlas Copco's VSD+ Technology

At Triple i, we understand the pressure that rising energy costs place on your operations. As the Authorised Distributor for Atlas Copco in the Wollongong and Illawarra regions, we provide top-tier compressor and air filtration equipment, services, and project solutions. Our mission is to help you overcome your energy challenges with cutting-edge technology, data logging, services and unparalleled support.

Why Choose Variable Speed Drive (VSD+) Technology?

Energy efficiency is more crucial than ever. Atlas Copco's Variable Speed Drive (VSD+) technology stands out by automatically adjusting the motor speed to match your specific air demand. This innovation can:

- **Reduce Energy Costs by Up to 50%:** VSD+ technology fine-tunes performance, significantly cutting down your energy consumption.
- **Enhance System Reliability:** Our compressors maintain peak performance even in the harshest conditions, ensuring minimal downtime and maximal productivity.

Harness the Power of Free Data Logging

Effective energy management extends beyond just technology—it requires insight. Our complimentary data logging services are designed to provide that clarity by:

- **Identifying Air Leaks:** Pinpointing leaks in your compressed air system, especially during downtime, helps you avoid unnecessary energy losses.
- **Optimising Maintenance Schedules:** Detailed reporting allows you to align maintenance with actual system performance, reducing costs and improving operational efficiency.

For compressors over 22kW, Triple i offers free data logging with comprehensive annual energy savings reports, helping you to visualise and achieve significant cost reductions.

At Triple i, we are committed to finding and delivering the perfect compressor solution for your application. Our expert team is here to guide you through every step, from selection to implementation and beyond.
